

A large-scale construction project is shown against a clear blue sky. A prominent blue tower crane stands in the foreground, its jib extending diagonally across the frame. In the background, several orange tower cranes are visible, one of which is lifting a concrete bucket. The building under construction is a multi-story structure with a curved facade, featuring concrete columns and beams, and is heavily encased in orange and blue scaffolding. The overall scene conveys a sense of active development and infrastructure growth.

WHY SLOVENIA?

Foreign direct investment (FDI) is equally important to Slovenia's economic growth as it is for global GDP and jobs worldwide. The Slovenian government has been working on improving the environment to attract quality business to the country and, in turn, create new jobs. For Slovenia as an FDI location quality has always been its core value and its cutting edge. Attention to quality runs in the blood of its people and in combination with vocational and university education makes the country's workforce often **No. 1 reason to invest** in Slovenia.
