

A low-angle photograph of a large-scale construction project. A tall blue tower crane is the central focus, its arm extending diagonally across the frame. To its left, several orange tower cranes are visible, some with loads suspended. The background features a multi-story building under construction, with its concrete frame and extensive scaffolding clearly visible. The sky is a clear, bright blue.

# WHY SLOVENIA?

Foreign direct investment (FDI) is equally important to Slovenia's economic growth as it is for global GDP and jobs worldwide. The Slovenian government has been working on improving the environment to attract quality business to the country and, in turn, create new jobs. For Slovenia as an FDI location quality has always been its core value and its cutting edge. Attention to quality runs in the blood of its people and in combination with vocational and university education makes the country's workforce often **No. 1 reason to invest** in Slovenia.

- **11<sup>th</sup> safest country** (Global Peace Index 2018)
- **2<sup>nd</sup> most secure energy system** in the world
- Well-developed ICT infrastructure
- Strong healthcare system

# AIRPOD - YOUR PRIVACY CAPSULE

Have you ever been stuck at the airport, waiting for your next flight with nothing to do and nowhere to hideaway? Over 400 million passengers in air transit per year face the same problems - lack of privacy, uncomfortable seats, and no place to relax. These problems are most apparent at the airports. Still, they also occur at many other places - train and bus stations, hospitals, fairs and venues, offices, business centres, shopping centres, universities, hotels, etc.

Today, air passengers do not have a private place to retreat and get a rest. They can either sit in uncomfortable chairs, book expensive lounges (still no complete privacy) or book a hotel room (inconvenient if the waiting time is less than 12 hours). Some of the airports are offering sleeping pods, but currently available products do not offer expanded functionality that would fit the needs of air passengers.

AirPod's vision is to provide people with a private place in the hectic, crowded world. We are creating a product by implementing the advantages of high technology to serve people and their well-being.
