**Niche player in field of customized bioplastic materials with disruptive know-how in current industrial field!**

Changing agro waste into ECO looking products.

## About us

### Material

Together with our partner we have developed 5 brand-new, 100% biodegradable/compostable, natural fiber reinforced bio-compound. Degradation in soil is adjusted through the material formulation.

### Process technology

Parts can be injection molded with industry standard processes and cycle times. We are supporting industrial partners with development process of new innovative trendy products.

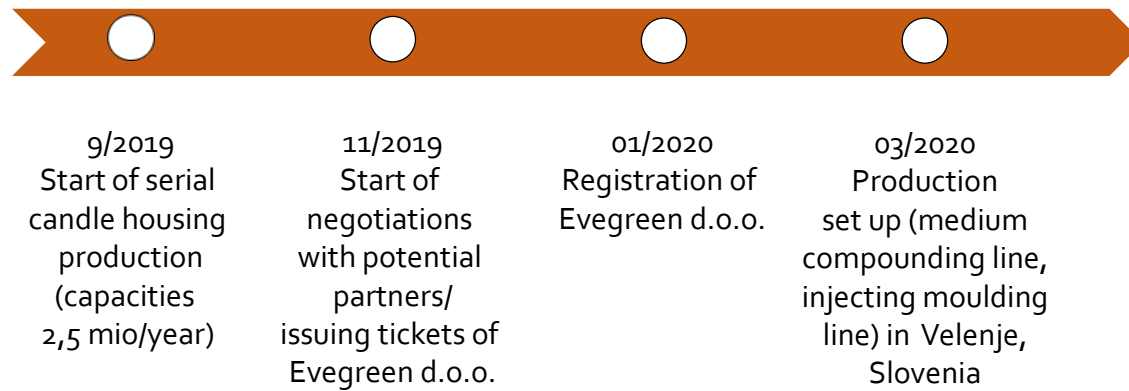

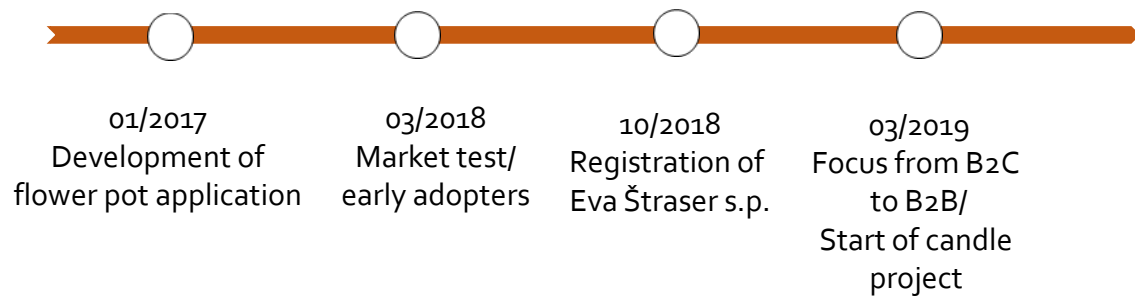

## The potential of implementing bioplastic:

- Packaging solutions like Jegermaister shots (after a year biomaterial in a soil becomes a food for microorganism/home compost use)
- One time use plates, cutely program etc. (eco look, biodegradable in industrail compost, food contact)
- Agro solutions like bioplastic flower pots or biodegradable hydroponic pots (natural protection against garden pests, additional fertilizer, biodegradable in a soil, tested by 10.000 end customers)
- Cementary candle solutions (plastic alternative, after the use - housing are returned to producers/reuse of housings/januar 2020/ EU market)
- Cosmetic containers, made by customized solutions (eco look, biodegradable in industrail compost)

Evegreen d.o.o.	
51 %	Eva Štraser s.p.
20%	dr.Karsten Brast
15%	Investor A
10%	Investor B
2%	Investor C
2%	Investor D

The Evegreen d.o.o. is offering:

- **15% of its share capital for a direct investment of 525.000 EUR**
- **10% of its share capital for a direct investment of 350.000 EUR**
- **2% of its share capital for a direct investment of 70.000 EUR**

Evegreen is looking for strategic investors from EU, who has open supply channels and are interested to become trend setters in the cosmetic, agro, packaging and candle sector.
